

2-Week Fat-Loss Workout + Diet Plan

8–21 August • ~1,500 kcal/day • ~130 g protein/day • Repeat this 2-week cycle

Goal: sustainable fat loss while maintaining muscle. Use the workout plan for Weeks 1–2, follow the diet below, then repeat the same 14-day cycle.

Diet Rules & Portion Notes

- **Whey shake:** 1 scoop whey + 1 banana + 200 ml Amul Taaza + 40 g oats + creatine. Budget ~490 kcal / ~37 g protein.
- **Amul High Protein Milk Coffee:** use your product providing ~35 g protein; with your added sugar, budget ~325 kcal. Adjust if your actual sugar amount changes this.
- **Protein bar:** 180 kcal / 12 g protein.
- **Pintola Chocolate High-Protein Oats:** 50 g provides ~12.5 g protein; calories depend on the exact label, so the plan budgets ~200 kcal before milk.
- **Chicken:** quantities below refer to cooked chicken breast unless stated otherwise.
- **Paneer:** quantities refer to regular paneer; exact calories vary by brand.
- **Dal/chilla/parantha:** homemade calories vary with flour, dal quantity and oil. Keep cooking oil controlled and count it.
- **Tuesday:** completely vegetarian/non-meat day.
- **Office lunch:** chicken is used only on selected days; paneer, dal chilla/parantha and curd are the default portable options.

14-Day Diet Plan

The numbers are planning estimates. Your exact totals will depend on the whey label, paneer brand, curd, dal recipe and amount of oil/sugar used. Aim for roughly 1,450–1,550 kcal and 125–135 g protein most days.

Progress & Safety

- **Steps:** start around 8,000–10,000/day and progress toward 10,000–12,000 if recovery is good.
- **Progressive overload:** when you reach the top of the rep range with good form, gradually increase the load.
- **Do not eat back all exercise calories:** wearable calorie estimates are imperfect.
- **Track:** weekly average weight, waist/hip/thigh measurements every 2 weeks, photos every 4 weeks, and gym strength.
- **Inner-thigh friction:** choose lower-impact cardio if running/jumping causes rubbing. Avoid high-volume jumping or movements that irritate the area.
- **Skin:** change out of sweaty gym clothes promptly and use breathable clothing. Avoid exercises that repeatedly rub an actively painful/open/draining area.
- **Medical:** recurrent painful bumps/boils in the inner thighs, hips or underarms that drain or bleed should be assessed by a dermatologist, particularly if they keep returning.

After 14 Days

If your average weight is trending down, gym performance is reasonably stable, hunger is manageable and recovery is good, repeat the same 14-day cycle. If progress stalls for several weeks, adjust calories/activity based on the trend rather than a single weigh-in.
